

PIONEER™ System
Size 8" x 40"

Limited Warranty:

The Manufacturer warrants the PIONEER™ filtration systems, to be free of defects in material and workmanship for a period of one year.

PIONEER™

Whole-House Lead & Removal System

PIONEER™ is specifically designed at a 0.5-micron nominal filtration level, to remove both particulate and soluble lead from your drinking water.

Soluble lead is invisible, odorless, tasteless, and needs to be chemically removed from water.

Particulate lead is like a tiny grain of sand that needs to be physically removed from water.

- The **PIONEER™ Point of Entry (POE) filter** is strategically designed to remove **BOTH forms of lead contamination from the whole house in a single filter.**
- The PIONEER™ Binder is designed to chemically react with soluble lead to create an ionic bond, kinetically removing lead from the water and producing clean water.
- As a POE filter that means **whole house drinking water starting at the source and giving peace-of-mind throughout the entire home** with a filter life up to 100,000 gallons or 1 year.
- The PIONEER™ POE filter meets certification by NSF/ANSI Standard 53 for lead, cyst and material safety requirements.

Other Harmful Contaminants PIONEER™ Removes:

In addition to lead, the patented PIONEER filtration system removes >99.95% of Giardia & Crypto, as well as Chlorine & Chloramine.

- **Giardia & Crypto** - Waterborne parasite that causes diarrheal disease; very resistant to chlorine-based disinfectants, common in drinking and recreational waters.
- **Chlorine & Chloramine** - Water disinfectants added to municipal water that have negative health effects and the most harmful exposure is through inhalation and skin adsorption of steam in a shower.

PIONEER™

First of its Kind Whole-House Lead & Cyst Removal System

Easy to understand LED Replacement Notification

The Real-time Dynamic LED System monitors water and flow rate and provides a visual color-coded notification to the homeowner, letting them know when to replace their filter.

Easy Filter Replacements and No Tools Required

PIONEER™ uses state-of-the-art snap-ring technology to eliminate the need for cumbersome tools. Homeowners can easily replace the filter in their PIONEER™ system by following a few simple steps.

Specifications

	Size	Micron Rating	Rated Capacity & Flow Rate	Peak Flow & % Reduction of Lead	Chlorine/Chloramine Taste and Odor Reduction Capacity	Pressure Drop Spec
PIONEER™ System	8" x 40"	0.5	Lead Reduction 100,000 gallons @ 4.51 GPM @ 99.62% reduction (378,541 Liters @ 17.1 lpm)	8 GPM (30.2 lpm) @ 99.62% reduction (*) >88,000 gallons at 8 GPM (333,116 Liters @ 30.2 lpm)	>300,000 gallons @ 15 GPM (1,135,533 Liters @ 56.8 lpm) with greater than 90% reduction, estimated capacity using 2ppm of free chlorine. >150,000 gallons @ 8 GPM (567,812 Liters @ 30.3 lpm) with greater than 85% reduction, estimated using 3 ppm of chloramine.	15 psld @ 4.51 GPM
