

PURECHOICE™

Reverse Osmosis System

The PureChoice™, with easy and affordable maintenance solutions, was designed to give you and your family clean, pure drinking water for a lifetime. Its high output membrane allows this system to meet the average household's drinking and cooking water needs.

Not all drinking water systems were created equal.

What makes the PureChoice™ better?

- Suitable for City or Well Water
- Pre Carbon Block is 36 Cubic Inches (50% more capacity)
- 50 Gallon Per Day TFC Membrane
- One Piece Manifold Virtually Maintenance Free
- Chrome Faucet
- Cartridges have Double O-Ring Seal
- Internal Drain
- 2.5 Gallon Storage Tank*
- 100% Tested and Validated - NSF/ANSI Certified
- ASO-Automatic Shut-off - Conserves water usage

A variety of faucet styles are available.

PureChoice™ 4-Stage RO System with Faucet

Limited Warranty:

- Seven Years on All Parts*
- Seven Years Labor*

*Excludes filters and membranes

Optional **Booster Pump** Upgrade

Benefits of a Booster Pump:

- Requires no electricity, powered by energy from brine water
- Improves recovery rates by as much as 400%
- Reduces waste water by as much as 80%
- Effective for inlet water pressure as low as 30 psi
- Fills product tank up to 4 times more rapidly
- Enhances contaminant rejection
- Up to 33% more tank pressure for more flow and volume

Package Pricing

Model	
PureChoice™ Reverse Osmosis	\$1,599.00
Standard Sink Installation	Included
1 Drink Location (Chrome Faucet)	Included
Total Package	\$1,599.00
Options	
Designer Faucet	\$275.00
Booster Pump Upgrade (required for some ice makers)	\$400.00
Ice Maker Connection (if accessible)	Included

Replacement Cartridges

Filters	
PureChoice™ Sediment Pre-Filter	\$39.75
PureChoice™ Carbon Pre-Filter	\$39.75
PureChoice™ Carbon Post Filter	\$23.00
PureChoice™ Pro TFC Membrane (50 gallons per day)	\$195.00

*Tank capacity and production based on optimal water temperature and water pressure.

(Ask a representative for further details)

PLEASE NOTE: Based on normal usage, filters should be changed once per year when pretreated with a Water Softener. Based on normal usage, membranes should be changed between 4-6 years when pretreated with a Water Softener.

PURECHOICE™

Reverse Osmosis System

Not all RO systems are created equal!

The PureChoice™ design has evolved from years of refinement. The precision-engineered manifold eliminates the tubing normally used to make internal system connections. The result is a clean, well-organized system that is much easier to maintain.

The PureChoice™ RO system is compatible with either chlorinated municipal water or a private well supply and uses a high-performance Thin Film Composite (T.F.C.) membrane for maximum results. High output is standard with PureChoice™ which provides more than enough water for most families.

Four-Stage Process:

- Water is filtered by a two stage, one micron fiber and carbon block pre-filter. This protects the membrane from chlorine and particulate matter.
- The membrane process produces great tasting, premium quality drinking water, which is stored for later use.
- A postcarbon filter is used to ensure fresh tasting , crystal clear quality.

Serviceable vs. Disposable

The PureChoice™ drinking water system was designed to last. It is engineered to be reliable, rugged and effective. It will provide many years of dependable service. Although it may be years before the first service is required, this series incorporates the best warranty the industry has to offer. It is then supplemented beyond the warranty with the **Exclusive Exchange Program**. This program will enable you to maintain your investment at the lowest possible cost for as long as you choose to own it.

How the Exclusive Exchange Program works:

Complete Assembly/Manifold Only

The system is covered in the original warranty provided with your equipment for a period of seven years. If service is required beyond the original warranty the Exclusive Exchange Program provides the original owner with an exchange program to replace the main assembly or the assembly manifold at a fixed rate according to the current prevailing price list in effect at the time replacement becomes necessary.

Storage Tank

The storage tank is also covered in the original warranty provided with your equipment for a period of seven years. If service is required beyond the original warranty it may be exchanged for a factory new storage tank at a fixed cost according to the current prevailing price list at the time repair or replacement becomes necessary.
