

SERIES 6000

Water Conditioning Systems

The Series 6000 is a value priced, conventional water softener that can be tailored to fit your specific needs. With a full warranty, these systems have more to offer than other standard water softeners.

Series 6000 with 15" x 17" x 36" Brine Tank

Limited Warranty:

- Salt Tank 5 year
- Media Tank 10 year

1-Year Parts & Labor Warranty

See warranty for complete details. Regular maintenance plan available. Ask for details.

Easy

Settings are easy to understand and use. With a properly set time and program you simply have to keep salt in it.

Water Conservation

A water conservation feature allows minimal water usage.

Built In By-Pass

An optional single lever by-pass valve allows an easy way to by-pass the system and provides a simple disconnect.

Two Tank Design

The two tank design protects controls from the harsh effects of salt and water that attack single tank systems.

Flexibility

Choice of salt tank sizes to fit most any space requirements.

Reliable

The five cycle 6000 Series valve is motor driven, there are no solenoids or diaphragms to stick or hang up. This is the most reliable system for consistent performance.

Replacement Cartridges

5800 SXT 100 TB 32,000 Grain (cash & carry unit only)	\$1,399.00
Bypass	\$150.00
Salt #120	\$40.00
4 Year Extended Warranty	\$449.00
Basic Install (pre-plumb)	\$600.00
Total Package	\$2,638.00
5800 SXT 150 TB 52,000 Grain (cash & carry unit only)	\$1,549.00
Bypass	\$150.00
Salt #120	\$40.00
4 Year Extended Warranty	\$449.00
Basic Install (pre-plumb)	\$600.00

SERIES 6000

Water Conditioning Systems

Dependable

The precision system that has made the Series 6000 System the choice of professionals for years.

Five Cycle Control Valve

- The 5800 Valve is powered by a motor-driven piston to assure reliability in every cycle.
- The Noryl® valve body is corrosion resistant and easy to service.
- The optional single lever by-pass makes it easy to turn system on and off.

Attractive System

The optional hard shell thermal cabinet, that protects against condensation, is white with black trim and has a matching brine tank.

Rugged

The resin tank has a smooth inner tank that is spun wrapped in fiberglass for exceptional strength. Tanks are made of FDA approved materials and certified by NSF.

Efficient

The 6000 Series high capacity resin, while being the most durable, also ensures the most efficient use of salt.

Design Options

The 6000 Series offers two primary designs:

1. The resin scrubber removes build up on the resin beads which makes it ideal for rusty well water. (Shown in diagram)
2. A conventional straight tube distributor is available, at no additional cost, for iron free water applications.

Durable

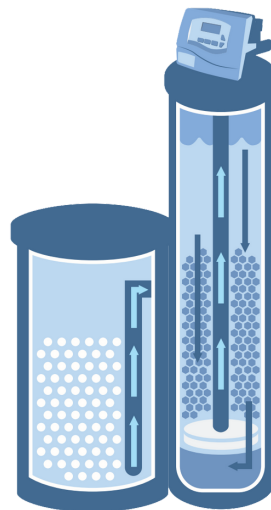

6000 Series salt tanks are made of rugged, seamless, polyethylene. Three different sizes of brine tanks are available to help fit the 6000 Series into most any space.

Security

The 6000 Series includes a safety brine system to provide shut down in the event of a failure, preventing brine overflow.

No Mushy Salt

The 6000 Series includes a salt shelf which keeps the bulk of the salt out of the water, eliminating the mushing and bridging experienced in conventional systems

Brine Tanks are available in three different sizes to fit in almost any space and are blow molded for strength and durability. The three sizes include square 150 lbs. (11" x 11" x 36"), rectangular 240 lbs. (15" x 17" x 36") and round 320 lbs. (18" x 40").
