City Water Applications
Upgrade to the New High-Efficiency Softener and enjoy a 25% savings in salt usage and 65% in water usage

SMARTCHOICE™

GEN II iTWIN

Twin Water Conditioning System

SmartChoice™ Gen II iTwin combines alternating iTwin tank design for an uninterrupted supply of soft water along with advanced diagnostics of the SmartChoice™ Gen II valve.

The SmartChoice™ Gen II, Twin is unlike any other softener on the market!

Continuous Soft Water with Advanced Diagnostics

The unique SmartChoice™ Gen II iTwin's advanced electronics provide extensive information about water usage, identify plumbing leaks and other uses that waste water and provide historical information logs on water-usage patterns. Since each tank is used to its full capacity, there is no need for reserve, adding even more efficiency. Other features include:

- Advanced electronics provide data on gallons of water used, flow rates, error messages, days since regeneration, etc.
- Auto-flush feature to refresh resin beds after periods of inactivity
- Regenerates with soft water
- Exchangeable components that separate easily
- Low salt alert
- System malfunction alert
- Control valves contain only one moving part Patented Vortech™ technology extends life and performance of media bed
- Alternating Tanks Provide Continuous 24 Hour Soft Water 1 inch flow (standard)
- Lithium battery backup

SmartChoice™ Elite

SMARTCHOICE™ GEN II iTWIN

Twin Water Conditioning System

Resin Scrubber Vortech™* Design

*Vortech™ tanks are manufactured by ENPRESS LLC

The Vortech™ Bottom Plate Distributor:

Unlike conventional distributors, the Vortech™ significantly improves the efficiency of the system. The innovative design of the bottom plate achieves a much greater resin cleaning yet is gentle on the resin, thus extending its service life.

The Vortech™ design creates fluidity of the media bed and extends contaminant removal capacity; which means less regenerations and significant reduction of water use...saving water and salt.

Brine Tank:

Brine tanks are available in three different sizes to fit in almost any space and are blow molded for strength and durability. The three sizes include square 150 lbs. (11"x11"x 36"), rectangular 240 lbs. (15"x17"x 36") and round 320 lbs. (18"x 40").

Serviceable vs. Disposable

This could be the last system you'll ever have to buy!

Many water conditioning systems on the market today are designed to be disposable, because they just weren't made to be serviced. The SmartChoice™ Gen II iTwin was designed to be a lasting appliance. Although it may be years made to before the first service is required, this system offers you the ultimate in long-term care, the Exclusive Exchange Program. All components of the SmartChoice™ Gen II iTwin models is easily separated and exchangeable with the factory. You have the option of exchanging the component yourself, or having one of our experienced technicians provide in-home service.

How the Exclusive Exchange Program works:

Resin:

The resin is covered in the original warranty provided with your equipment for a period of seven years. If service is required beyond the original warranty, simply use the quick disconnect feature to detach the control valve from the resin tank, then simply exchange the tank for a factory refurbished tank. The price for exchange may be found on the prevailing price list at the time of exchange.

Control Valve:

The control valve is also covered in the original warranty provided with your equipment for a period of seven years. If service is required beyond the original warranty, simply use the quick disconnect feature to detach the control valve from the resin tank. Then simply exchange the valve for a factory refurbished valve. The price for exchange may be found on the prevailing price list at the time of exchange.
