

SmartChoice™ Gen II Eradicator
*U.S. Patent No. 7,300,569

Limited Warranty:

The SmartChoice™ Gen II Eradicator warranty includes:

- **One Year on All Parts**
- **Lifetime on Mineral Tanks**

FREE 5-YEAR IN-HOME SERVICE POLICY WITH AQUA SYSTEMS® INSTALLATION.

See warranty for complete details.

Annual maintenance required to maintain warranty. Ask for details.

SMARTCHOICE™ GEN II ERADICATOR

The Chemical-Free Solution for your Toughest Well Water Problems

Until now, the most common solution for problem water involved harsh chemicals - a classic case of the cure being as bad as the disease! Now there is a new solution, a proven technology, the SmartChoice™ Gen II Eradicator. The SmartChoice™ Gen II Eradicator uses a chemical-free Air Induction Filter to clean the water without harsh chemicals.

Engineered and Installed for Lasting Performance

The SmartChoice™ Gen II Eradicator is designed for high performance, long life and trouble-free operation and maintenance. It features our exclusive line of SmartChoice™ Gen II controls, all designed to provide a lifetime of reliable operation. All the components can be easily removed for efficient maintenance or replacement, even if your first service need is years away.

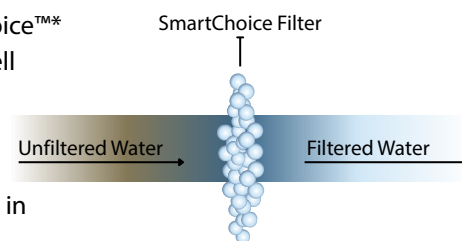

- One of a kind patented technology*
- Removes iron, manganese and odor from well water
- Metered system - regenerates based on usage
- Intelligent electronics - monitors usage history
- Patented Vortech™ technology extends life and performance of media bed
- Exclusive factory exchange program
- Exclusive media exchange module
- SmartChoice™ Gen II "total control" valve
- 1" high flow design
- No fasteners, screws, nuts or bolts to corrode
- Operated by a single motor driven piston
- Lifetime fiberglass wrapped, seamless tanks

SmartChoice™ Gen II Control Valve Easy Disconnect

Using the O in H₂O

Sophisticated, yet surprisingly simple, the SmartChoice™ Gen II Eradicator is natural oxidation technology. Well water cycles through the Eradicator where air - and its O₂ - oxidizes the iron and sulfur without chemicals, without air compressors or aerators! This unique patented technology is equally efficient in managing heavy iron and sulfur water.

Pricing

Chemical-Free AIF II 1054 Iron Filter*	\$2,699.00
Chemical-Free AIF II 1354 Iron Filter*	\$2,999.00
Chemical-Free AIF II 1054 Maxix*	\$3,099.00
Chemical-Free AIF II 1354 Maxix*	\$3,299.00

PLEASE NOTE: For extreme water problems, custom systems can be designed. Ask a representative for details. Optional air dryer \$150.

*Pre-plumb or replacement installation included.

SMARTCHOICE™ GEN II ERADICATOR

The Chemical-Free Solution for your Toughest Well Water Problems

Control the iron in your home...

- Stop iron stains from occurring
- Protect plumbing, fixtures, appliances and clothing
- Eliminate the need for harsh chemical cleaners in showers, sinks, toilets and appliances
- Protect your water softener from iron buildup

Turn "stink water" into fresh water

- The Eradicator system removes the sulfur to produce clean, odor-free water
- Protects pipes from black oxidation caused by sulfur water
- Eliminates the need for traditional chlorine feed treatment systems

Get the SmartChoice™ Gen II Eradicator that is right for you

Every well is different, so no one system will be right for everyone. Instead, we take proven technology and configure just the right solution for you, your family and your water.

Standard systems:

- Solutions for mild to high levels of iron < 1 ppm - 10 ppm
- Solutions for wells with iron and sulfur
- Solutions for high sulfur water and water containing methane gas*

**In severe applications the SmartChoice™ Gen II Eradicator can work with a chemical feed system when needed. The threshold for chemical-free treatment of sulfur and methane gas can vary depending on water chemistry at a specific location.*

Custom-tailored systems for extraordinary conditions are available.

Special considerations

Systems are not for use with irrigation systems, swimming pools, hot tubs, outdoors, or other high-consumption applications. Eradicator systems require periodic backwashing during low water usage. (Normally at night) Water should not be used during this period. If 24-hour service with no interruptions is required, special design is needed.
