

High-Efficiency SmartChoice™ Gen II
with 15" x 17" x 36" Brine Tank

High-Efficiency SmartChoice™ Gen II iTwin
with 15" x 17" x 36" Brine Tank

Warranty Includes:

- Seven Years on All Parts*
- Lifetime on Mineral Tank
- Lifetime on Brine Tank

FREE 7-YEAR IN-HOME SERVICE POLICY WITH AQUA SYSTEMS® INSTALLATION.

See warranty for complete details.
Regular maintenance plans available.

HIGH-EFFICIENCY SMARTCHOICE™ GEN II

Water Conditioning Systems

The High-Efficiency SmartChoice™ Gen II capitalizes on all the original advancements of the SmartChoice™ Gen II. Along with these improvements, the high-efficiency system:

- Reduces salt usage by 25 percent (*only uses 6 lbs. of salt per regeneration*)*
- Reduces water usage by 65 percent (*only uses 21 gallons of water per regeneration*)*
- Requires less electricity (*total regeneration time less than 52 minutes*)

This makes the new High-Efficiency SmartChoice™ Gen II one of the most environmentally friendly water softening systems in the world. What's more is this increased efficiency, money savings, and performance comes with no sacrifice in water quality.

*32,000 grain systems

Smart Design Engineering

The SmartChoice™ Gen II continues to improve on past designs. Ultra low power consumption, maximized salt efficiency and an energy saving auto display turn off are a part of this innovative system. The SmartChoice™ Gen II is also a Smart Appliance. Advanced electronics provide extensive information about water usage, identify plumbing leaks and other uses that waste water and provide historical information logs on water-usage patterns. Other original features include:

- Exchangeable components that separate easily
- Lithium battery backup
- Patented Vortech™ technology extends life and performance of media bed
- Failure to use salt alert
- System malfunction alert
- Non-corrosive materials on all parts
- Regeneration based on water usage
- Color coded screens
- Easy, low cost service options
- Only one moving part
- Salt Monitor

Installed package pricing

	Single Tank	Single Tank
High Efficiency SmartChoice™ Gen II		
32,000 Grain	1 Cubic Foot	1 Cubic Foot
Bypass, 200 lbs. salt, installation*	\$2,799.00	\$3,199.00
Salt Monitor Included	Included	Included
Total Package	\$2,799.00	\$3,199.00
SmartChoice™ Gen II 150 VT		
52,000 Grain	1 Cubic Foot	1 Cubic Foot
Bypass, 200 lbs. salt, installation*	\$2,949.00	\$3,399.00
Salt Monitor Included	Included	Included
Total Package	\$2,949.00	\$3,399.00

*Pre-plumb or replacement installation.

Wi-Fi capabilities add \$300.

PLEASE NOTE: Prices do not include sales tax.

HIGH-EFFICIENCY SMARTCHOICE™ GEN II

Water Conditioning Systems

Resin Scrubber Vortech™* Design

*Vortech™ tanks are manufactured by ENPRESS LLC

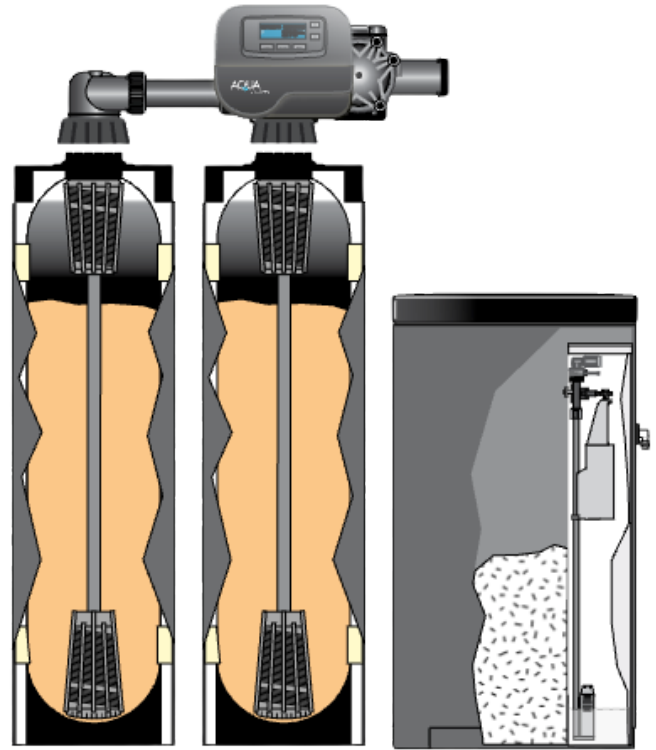

The Vortech™ Bottom Plate Distributor:

Unlike conventional distributors, the Vortech™ significantly improves the efficiency of the system. The innovative design of the bottom plate achieves a much greater resin cleaning yet is gentle on the resin, thus extending its service life.

The Vortech™ design creates fluidity of the media bed and extends contaminant removal capacity; which means less regenerations and significant reduction of water use...saving water and salt.

Brine Tank:

Brine tanks are available in three different sizes to fit in almost any space and are blow molded for strength and durability. The three sizes include square 150 lbs. (11"x11"x 36"), rectangular 240 lbs. (15"x17"x 36") and round 320 lbs. (18"x 40").

Serviceable vs. Disposable

This could be the last system you'll ever have to buy!

Many water conditioning systems on the market today are designed to be disposable, because they just weren't made to be serviced. The SmartChoice™ High-Efficiency Gen II models were designed to be a lasting appliance. Although it may be years made to before the first service is required, this system offers you the ultimate in long-term care, the **Exclusive Exchange Program**. All components of the SmartChoice™ High-Efficiency Gen II models are easily separated and exchangeable with the factory. You have the option of exchanging the component yourself, or having one of our experienced technicians provide in-home service.

How the Exclusive Exchange Program works:

Resin:

The resin is covered in the original warranty provided with your equipment for a period of seven years. If service is required beyond the original warranty, simply use the quick disconnect feature to detach the control valve from the resin tank, then simply exchange the tank for a factory refurbished tank. The price for exchange may be found on the prevailing price list at the time of exchange.

Control Valve:

The control valve is also covered in the original warranty provided with your equipment for a period of seven years. If service is required beyond the original warranty, simply use the quick disconnect feature to detach the control valve from the resin tank. Then simply exchange the valve for a factory refurbished valve. The price for exchange may be found on the prevailing price list at the time of exchange.
